Join Us for Lunch to Learn About

## VOIP Design Options for K-12

Friday, October 26, 2018 - 11:30 a.m.

The College of DuPage - Silverleaf Conference Room

This event will give you the opportunity to learn about VoIP phone system architecture and design options for K-12 school districts in a relaxed, non-sales environment. The event will include a presentation and discussion on hosted (cloud-based), managed, and premises-based VoIP and will provide an understanding of your options, the pros and cons of each option, and costs.

Our engineers, several of whom are IT network instructors at local community colleges, will be on hand to answer your questions.

This is a free event and a complimentary lunch will be served at the Silverleaf Conference Room, located in the Culinary Arts & Hospitality Center at the College of DuPage. Come and learn which design options may work best for your school.

**Register Here: [VoIP Design Options for K-12 Lunch & Learn](#)**

When: Friday, October 26, 2018 at 11:30 a.m.

Where: The College of DuPage  
425 Fawell Avenue, Glen Ellyn, IL 60137  
Culinary Arts & Hospitality Center  
Silverleaf Conference Room  
Room CHC 2001 (Free parking available)

Who Should Attend: K-12 School IT Personnel, Administrators, Staff, or Board Members

## Planning Your 2019 School Technology Infrastructure

Planning your school's technology infrastructure can be a daunting task. As you prepare your 2019 E-Rate Wish List, we can present you with a variety of options, based on your budget and existing equipment.

As a full service solutions provider, NexGen Services partners with schools to answer questions and deliver solutions that help solve their most complicated needs. Our services are designed specifically to help schools upgrade their technology while staying within budget.

We are an E-Rate approved vendor and are experienced in working through the E-Rate process. We will share our experience and knowledge to help you make well-informed technology decisions.

### Hosted, Managed, or On-Premises - Which VoIP Phone System is Best for Your School?

VoIP is an acronym for Voice over Internet Protocol, today's standard in phone systems. Many schools are replacing their aging digital phone systems with VoIP. VoIP systems consist of a phone server and IP phones and typically run on the same network as your computers. In most implementations, the user's computer plugs into the back of their phone. In many cases, that shared infrastructure results in lower costs than traditional systems and VoIP systems offer more features and flexibility.

Today, VoIP is offered in three options: [Managed, Hosted or On-Premises](#) systems. To learn more sign up for our [VoIP Design Options for K-12 Lunch & Learn](#) on Friday, October 26, 2018, from 11:30 AM to 2:00 PM CDT at the College of DuPage.

### The Allworx Phone System 911 Emergency Notification Feature

The Allworx VoIP phone system includes Emergency 911 monitoring as a standard feature, that can notify assigned staff via desk phones, mobile devices, emails and text messages, when a 911 call is made. This notification identifies where the emergency call was initiated - down to the exact building and room number - helping to ensure that urgent news reaches the people best able to implement timely safety procedures.

In order to provide every school district with a modern phone system designed to meet the needs and improve the safety of schools, Allworx will provide 15 free Verge 9304 phones for every 100 Verge phones purchased by a school district.

To learn more sign up for our VoIP Design Options for K-12 Lunch & Learn on Friday, October 26, 2018, from 11:30 AM to 2:00 PM CDT at the College of DuPage.

### About NexGen / S&G Communications

*Our engineers provide design and implementation of **IP phone systems and network services** from all the leading carriers. We also offer **WiFi services, cloud services, network analysis and network optimization services.***

*Our technicians **install voice and data cabling, fiber optic cabling, racks, cabinets, under-floor tray***

**systems, wireless access point installation, and more.**

**Our installers are certified, union technicians.** By using quality products and certified technicians, we can provide you with an infrastructure capable of supporting all applications designed for today's standards.

**Training and Service** - As a provider of premier IP phone systems, we offer free on-site training and a suite of post-implementation services to help you successfully maintain your system.

## NEXGEN IS AN E-RATE APPROVED VENDOR

Fiber optic, cabling, and network services are covered by E-Rate and you can save considerably by bundling your cabling, networking, and telecommunication services. Learn more at our Lunch & Learn or contact us at 847-459-1220 or [info@nex-gen-services.com](mailto:info@nex-gen-services.com).
