

Dover has Designated Verkada as the Preferred Security and Surveillance Provider

Increase Your Security,
Monitor All Sites
at the Same Time
from Your Computer
or Cell Phone

One Platform and
AI Technology
by Verkada

Verkada's Video Surveillance System is powered by Artificial Intelligence (AI) making it both smart and simple to create a secure work environment.

- Verkada Security Systems is providing real-time monitoring of production lines, identifying safety hazards, preventing theft, optimizing workflows, improving quality control, and enabling faster incident investigations.
- Verkada's "smart" security products, include video surveillance cameras, alarms, access control, card readers, and air quality sensors.
- Consolidate your entire security operation under a single cloud-managed platform, accesible from anywhere.

To date, S&G Communications has installed Verkada security systems at

- **Belanger Vehicle Wash Systems** in Livonia, MI
- **Dover Fueling Solutions** in Austin, TX
- **Destaco** in Wheeling, IL, Mt. Juliet, TN, Redwing, MN, and Auburg Hills, MI
- **Waukesha Bearings DPC** in Antigo, WI, Waukesha, WI, and Pawcatuck, CT
- **Vehicle Services Group** in Madison, IN

Virtually all of these companies experienced similar issues:

- Outdated cameras with marginal to poor video quality
- Limited coverage of internal and external building security
- Limited ability to evaluate employee safety concerns
- Lengthy investigations due to DVR or NVR search
- Lost footage of critical events
- Limited evidence tracking and management
- Limited integration with other systems like payroll
- No intrusion alarms

When these Dover subsidiaries started looking at solutions to replace their antiquated security systems, they were motivated by **Verkada's 30-day free trial of their cloud-managed solution**. Immediately, they were able to experience the benefits of Verkada's integrated system firsthand.

SOLUTION

One Platform to Simplify Security

- All security and access products on a single cloud-managed platform, accessible from anywhere on any device
- AI-enabled hybrid cloud cameras record continuously with up to 365 days of onboard retention
- Centrally manage all Verkada devices and users from any browser or mobile device

Real-Time Visibility of the Workplace, Perimeter, Loading Docks, Parking Lots

- Access and manage footage from anywhere on any device and monitor floor operations in real time
- Stream up to 30 camera feeds per page (up to 10 customizable layout pages) on a single display
- Instantly share live video streams with managers and security or police

Easy Management

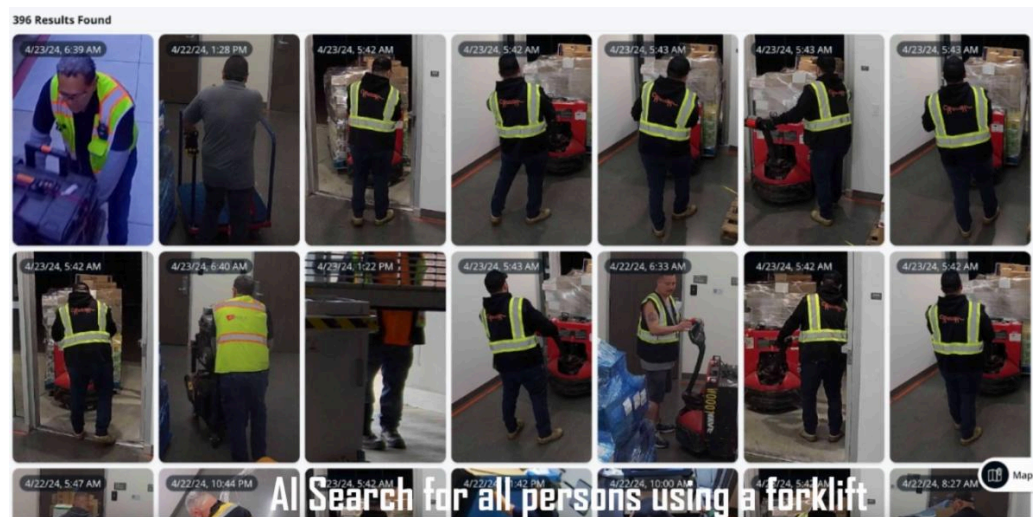

- No DVRs, NVRs, VPNs or Port Forwarding, as all recordings are housed in the Cloud
- All cameras are POE
- Bandwidth-friendly – operate at only 20-50 Kbps in steady state
- Unlimited Users

Access Control & Management – Card Readers

- Configure doors and security gates from any device
- Enable proactive monitoring with alerts for camera events like motion, tampering, people of interest, license plates and camera status
- Safeguard sensitive areas like labs, IT rooms, and production areas with role-based permissions and anti-pass back policies

Search Capabilities

- Find critical footage in seconds with Verkada's Artificial Intelligence capabilities
- Filter results using search based on time, appearance, clothing or vehicle color, and more

Alarm

- Cameras, intrusion sensors, access control, and environmental sensors can all be used to detect unusual activity

One platform for industrial security

Easily monitor, detect and respond to incidents across manufacturing sites

- Choose which Verkada devices can trigger an alarm and how the system will respond to a threat such as police dispatch, automated deterrence devices, or prerecorded messages

Sensors

- Verkada's SV20 Series Air Quality Sensors provides everything you need to ensure safe air quality and environmental building monitoring.

WHY VERKADA?

From access control to Artificial Intelligence enhanced search capabilities, the feedback from these Dover facilities has been totally extraordinary. Now, several other Dover sites are considering Verkada to improve their security, operations, and management capabilities.

Our Suite of Cloud-Based Solutions

Modernize your building's approach to physical security and awareness in an all-in-one solution.

Camera	Access Control	Environmental Sensor	Alarms	Guest	Mallroom	Intercom
Powerful onboard processing to bring simplicity and speed to your investigations.	Plug-and-play access control solution built for ease of use and limitless scale.	Data-driven insights for monitoring changes across your environment.	Cloud-managed intrusion detection with 24-7 professional monitoring.	Personalize the check-in experience for all types of visitors while integrating with cameras and access control.	Intuitive app and dashboard to track shipments and help ensure deliveries get to the right people.	Seamless talk-down and unlock capabilities to manage building traffic right from arrival.

About S&G Communications

For over 25 years, NexGen/S&G Communications has been assisting enterprises with their technological upgrades and installations including VoIP phone systems, WiFi, network services, cabling, and surveillance system needs. We are a **Certified Gold Verkada Partner**.

We'd love to share with you how other companies are using Verkada and how the Verkada product line can enhance safety and security at your business. We offer turn-key implementation and installation. We have union cabling technicians and certified network engineers on staff, all very experienced with the Verkada line.
