## Allworx X-Series End of Life & Trade-In

The Allworx x-series servers, which includes the 6x, 6x12, 24x, and 48x, has been discontinued and replaced with the Allworx Connect series.

Allworx will continue to honor existing hardware warranties, but after updating to software version 8.5, additional updates will be unavailable.

Allworx is offering attractive trade-in options for the new servers. The new servers have faster processors and solid state drives. They also come with a new 5-year hardware warranty and software update licenses.

This is an opportune time to consider a hosted Allworx option. It may be more economical with operational and disaster recovery benefits. The cost of a fiber optic network connection continues to come down and for many customers, we have been able to replace their older T-1 connection at about the same price.

For more information, please contact Jack Bush at 847-459-1220  
or [jbush@sandgcom.com](mailto:jbush@sandgcom.com).

---

**Upgrade Your Allworx Server**  
**Trade In/Trade Up and \$ave**

**Connect™ Servers**

The Connect family of servers comes in five models. So whether you have a few employees in a single location or hundreds of employees across multiple locations, [Allworx Connect](#) provides enterprise-grade business phone features in an affordable package.

---

## **Hosted VoIP Solution for Allworx** **Use Your Existing Allworx Phones**

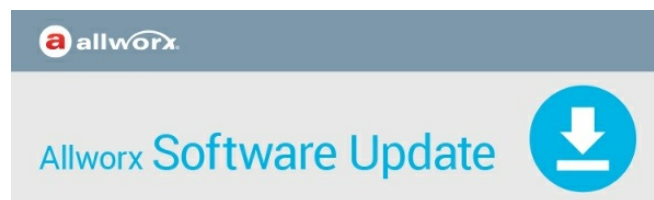

Hosted VoIP is another term for Hosted PBX. "Hosted" means the VoIP server is located at the provider's off-site data center rather than at your site. Secure backup service is available for your hosted Allworx with two data centers.

A hosted option for your Allworx phone systems is now available. It can be a lower cost solution that includes a refresh of your Allworx server, phones, and warranties. As your current contract expires, I would encourage a close look at it.

We can quote the network and phones as a bundle, generally at a lower cost, and act as your single point of contact. Secure backup service is available for your hosted Allworx with two data centers.

For more information, contact Jack Bush at 847 459 1220 or [jbush@sandgcom.com](mailto:jbush@sandgcom.com).

---

## **System Software 8.6 - More Users, More Features**

**Announcing the availability of System Software Release 8.6!**

**Release 8.6 includes:**

- Support for up to 1,975 users in multi-site networks;
- Support for the upcoming Allworx Interact Softphone™ (Early Access Beta release 1Q2020). Requires licenses to be provided by a new Allworx Interact Softphone Feature Key;
- Enhancements to Emergency 911 Call email notifications, including an email test option;

- Other miscellaneous enhancements and bug fixes.

Reminder:

**System Software Release 8.6 runs on Allworx Connect servers, only.** No support is provided for Allworx 6x, 6x12, and 48x servers nor for multi-site networks that are mixed, with both x-series and Connect servers.

---

## S&G Communications

Our engineers provide design and implementation of IP phone systems and network services from all the leading carriers. We also offer WiFi services, cloud services, network analysis and network optimization services.

Our technicians install voice and data cabling, fiber optic cabling, racks, cabinets, under-floor tray systems, wireless access point installation, and more. Our installers are certified, union technicians. By using quality products and certified technicians, we can provide you with an infrastructure capable of supporting all applications designed for today's standards.

Allworx Training and Service Center - As a premier provider of Allworx IP phone systems, we offer free on-site training and a suite of post-implementation services to help you successfully maintain your system.
