## **Allworx System Software Release 8.5**

**Allworx has released System 8.5 now supporting more users per server, Park-to-Extension, and amazing upgrades to Allworx Reach and Allworx Interact**

- Support for up to 250 users on Allworx Connect 731 Systems and 60 users on Allworx Connect 530/536 servers
- The Allworx Connect 731 is now a direct replacement for the 48x; the 530/536 is now a direct replacement for the 6xi; the 320/324 is now a direct replacement for the 6x12.
- Park-to-Extension for parking calls for specific users or groups
- Secure remote server administration using client (web browser) certificates
- Spanish and French Canadian character support for user and other displayed names
- Import/Export of Audit PIN Codes
- Other miscellaneous enhancements

Note: System Software Release 8.5 will be the last major release to be supported on Allworx 6x, 6x12 and 48x servers.

---

## **Important Allworx Announcement**

**System Software Release 8.5 will be the last major release to be supported on Allworx 6x, 6x12, and 48x Servers. Now is the time to take advantage of the trade-in opportunity to upgrade to an Allworx Connect server. (More about the Connect server below.)**

**Connect™ Servers**

**Trade-In an X series server for an Allworx Connect server and take advantage of special savings!**

The Connect family comes in five models that can easily scale to meet your business needs. So whether you have a few employees in a single location or hundreds of employees across multiple locations, [Allworx Connect](#) packs in enterprise-grade business phone features in an affordable package.

**Allworx Telephone 9200 Series Trade-in Specials**

Trade in your 9200 series phones for the new [Allworx Verge](#) - a new class of mobile-compatible business phones for small to mid-sized businesses. With a Verge IP phone on your desk and the Allworx Reach mobile app in your pocket, you can talk on the go or in the office without missing a beat.

**Allworx Reach Software Release 5.1**

Allworx Reach™ extends the rich functionality of the Allworx IP phone to mobile devices. The latest 5.1 releases of Allworx Reach extend the new Park to Extension feature right to your mobile device.

**Allworx Interact Software Release 4.0.29.2023**

Allworx Interact - the ultimate call control dashboard - combines the ease of a PC-based interface with the high voice quality of the Allworx IP phone to boost employee productivity. The latest release 4.0.29.2023 provides an extremely powerful interface for the new Park to Extension feature, as well as enhanced drag-and-drop behavior.

**S&G Communications**

Our engineers provide design and implementation of IP phone systems and network services from all the leading carriers. We also offer WiFi services, cloud services, network analysis, and structured cabling services.

Our cabling services include voice and data cabling, fiber optic cabling, racks, cabinets, under-floor tray systems, wireless access point installation, and more. Our installers are certified, union technicians. By using quality products and certified technicians, we can provide you with an infrastructure capable of supporting all applications designed for today's standards.

Allworx Training and Service Center - As a premier provider of Allworx IP phone systems, we offer free on-site training and a suite of post-implementation services to help you successfully maintain your system.
