S&G Communications

Business Phone Systems - UCaaS - Network Services - Structured Cabling - WiFi

At NexGen/S&G Communications, we have investigated numerous commercial phone systems and hosted providers and are very selective about which ones we offer to our customers.

We have partnered wth **Allworx, Broadview, FirstComm**, and a **Gigtel** to offer you a a premier selection of phones and a variety of features. Contact us to let us help you decide which are best suited for your business.

Unify Your Communications

Add more functionality and flexibility to your phone system with a hosted **UCaaS** system.

Unified Communications, (UCaaS), is simply a hosted phone system with added capabilities like video conferencing, mobility, chat & text.

With UCaaS, you can have all of these features for **less than you're spending on a legacy phone system**.

- Pay only for the services needed and add features and services as you grow.
- The hosted option includes managing all the software upgrades and all the maintenance
- Operating expense frees up your capital
- Pay "per seat" so you know exactly what your costs will be each month

State of the Art Desk Phones with Rich Features, including:

- Auto attendant and customized call routing
- Multi-site business unification
- Customized company phone directories
- Voice mail to email
- Call conferencing
- Presence settings
- Call monitoring
- Emergency 911 notification
- Call queuing and recording
- Touch screen and more

Work Anywhere with Mobile Apps and Soft Phones –
All part of your
Unified Communications System

Mobile Apps

No need to forward your office calls - they come directly to your mobile device.
Caller ID shows your office phone number, not your cell phone number.
Place calls instantly using your company directory, contact list, or call history.
Dial by extension number to anyone in your company directory.
Hold, transfer, or conference calls.
Easily manage your voice mails with respond or forward commands.
Voice mail to email.
Change your presence settings from your cell phone

Soft Phones

The soft phone app is part of the unified communications system that allows you to make phone calls from a computer.

Now you can work remotely access your business phone with just your laptop - without the need for any phone hardware - and still enjoy all the rich features you have on your office phone at the office. It will work well on your home Wi-Fi; no need for a phone power cord or data cable to your home router.

Virtual Meetings and Collaborations with MS Teams, Salesforce, and More

- Connect work teams online in real time, all on the same platform

- Send, share, and edit file attachments with other users

- Fax to email capabilities

- CRM, Outlook, and other 3rd party integrations
