ALLWORX UPDATES

Announcing Allworx Reach 5 for iOS Devices

Allworx Reach 5.0 is now available at the Apple App Store. Reach 5.0 uses the latest tool kit provided by Apple which will allow us to introduce exciting new features in the future! Go to your App Store to download Allworx Reach 5.0. Allworx System Software 8.3 or higher is required.

Allworx Reach 5.0 for Android devices will be released in the near future.

Reach™ Mobile App for iOS and Android Devices

**Turn your cellphone into your office phone
whenever you activate your REACH app.**

- No need to forward your office calls - they come directly to your mobile device.
- Outgoing calls show your office phone number, not your cell phone number.
- Place calls instantly using your company directory, contact list, or call history.
- Dial by extension number to anyone in your company directory.
- Make or receive multiple calls, hold, transfer, or conference them together.
- Easily manage your voice mails with respond or forward commands.

Announcing Allworx® System Software Release 8.4!

Release 8.4 contains the following new features:

- Support for the Allworx® Verge™ 9304 IP Phone;
- Remotely override the current day/night mode and/or greetings for a schedule from the Audio Message Center;
- Automatically updates feature keys to simplify installation;
- Provides an option to require callers to listen to the greeting/custom messages completely;
- International Dialing Improvements;
- Provides an option to disable the ACD No Agents Logged In alarm.

**For more information or to schedule a demo,
please contact Jack Bush at 847-459-1220**

This Allworx competitive product offering makes upgrading your phone system an affordable option for your business. Upgrade your existing Allworx phone system or practically any other business phone system and SAVE! The promotion includes the latest Allworx Verge™ VoIP phones, the newest version of the Allworx Reach™ mobile app, and the latest Allworx Connect™ server and software.

S&G Communications

Our engineers provide design and implementation of IP phone systems and network services from all the leading carriers. We also offer WiFi services, cloud services, network analysis and network optimization services.

Our technicians install voice and data cabling, fiber optic cabling, racks, cabinets, under-floor tray systems, wireless access point installation, and more. Our installers are certified, union technicians. By using quality products and certified technicians, we can provide you with an infrastructure capable of supporting all applications designed for today's standards.

Allworx Training and Service Center - As a premier provider of Allworx IP phone systems, we offer free on-site training and a suite of post-implementation services to help you successfully maintain your system.
