

Improving Business and Workplace Safety with Surveillance Camera Systems

Security cameras positioned throughout the interior and exterior of your business or workplace can help prevent crime, break-ins, or theft. Continuous monitoring also allows employees and management to safeguard inventory and assets, as well as proactively mitigate risks before they occur.

We can offer you reliable, high-quality products for implementing a surveillance solution that meets your requirements. You can depend on them to deliver a fast, substantial return on your investment.

Camera System

- Stores the video on the camera for 30, 60,90 days or more, then uploads it to the Cloud
- Uses AI for enhanced, rapid search
- Runs on the same standard data cable as your computers; uses your internet connection
- Sensors
 - Motion - Gun shot - Noise level
 - Vaping - Temperature, humidity
 - Air quality - VOCs, particulates

Links to First Responders

- Alerts local police and fire departments
- Can provide in-vehicle video to first responders while in route

Optimized Viewing Station

- Up to 300 cameras, 30 per page, 10 pages
- Smart tiles display active areas

IP Camera Systems with AI

- Uses Artificial Intelligence for enhanced, speedy search results, quickly locating video of interest
- Searches by object type, i.e., by car, person, gender, color, or type of clothing
- Replaces lengthy sequential viewing of video tapes

Services We Provide

- Indoor and outdoor cameras with on-camera and cloud storage
- Service licensing with viewing and first responder connectivity
- Cabling and camera installation
- Camera system integration with your existing computer network and internet

Expertise in Video Surveillance

John Bush and Billy Meador are former Orland Park and Chicago police officers. They are familiar with video surveillance and evidence tracking and can help you optimize and customize a video surveillance system for your needs.
