

### Improve Student Safety on Campus with IP Security Cameras

Prioritizing safety is a must for schools looking to instill a secure learning environment. Given the high visibility associated with school-based violence today, more schools are taking proactive measures to improve campus security.

To better prepare themselves for any future situation, school safety and security teams have turned to IP cameras in schools as a way of enhancing visibility into day-to-day activities and operations.

- **Campus Security:** Today's cameras are linked to the internet and can provide first responders with critical information in an emergency to ensure student and faculty safety and health.
- **Detering Crime on Campus:** Cameras can safeguard schools from more common day-to-day incidents. Surveillance cameras discourage instances of vandalism, larceny, and assault. They can be used to standardize school visitor management.
- **Promoting Positive Behavior:** The presence of cameras provides awareness that negative behavior can be captured. Monitoring and AI-assisted search of video footage allows administration to ensure that proper school conduct is being observed.
- **Resolving Incidents:** Most inter-student conflicts include two opposing accounts of an incident. School surveillance cameras give school administrators the ability to consult video evidence of an event. This footage is used to identify suspects, and serves as compelling evidence during the disciplinary phase of investigations.

#### IP Camera Systems with AI

- Uses Artificial Intelligence for enhanced, speedy search results, quickly locating video of interest
- Searches by object type, i.e., by car, person, gender, color, or type of clothing
- Replaces lengthy sequential viewing of video tape

#### IP Cameras

- Are an extension of your existing computer network and internet
- Use standard data cable
- They're powered by a POE data switch
- Cameras store the video for 30, 60, or 90 days, then upload it to the cloud
- Stored on the AWS Cloud for up to one year

OUR CUSTOMERS

This is a partial list of our customers for whom we have provided voice and data cabling, wireless infrastructure, or IP phone systems.

*Northwestern Medicine - Esmark Steel Group - Personal Creations  
Echo USA - GEA Farm Technology - Keiffer Starlite*

Our IBEW Local 134 union technicians are known for their quality workmanship and excellent customer service.

We are a Veteran Owned Small Business certified by the State of Illinois
