Business Phone Systems - WiFi Design & Installation - Network Services - Structured Cabling

Allworx X-Series End of Life & Trade-In

The Allworx x-series servers, which includes the 6x, 6x-12, 24x, and 48x, has been discontinued and replaced with the Allworx Connect series.

Allworx will continue to honor existing hardware warranties, but after updating to software version 8.5, additional updates will be unavailable.

Allworx is offering attractive trade-in options for the new servers. And, this is an opportune time to consider a hosted Allworx option. It may be more economical with operational and disaster recovery benefits.

For more information, please contact Jack Bush at 847-459-1220 or jbush@sandgcom.com.

Upgrade Your Allworx Server Trade In/Trade Up and Save

Connect™ Servers

The Connect family of servers comes in five models. So whether you have a

few employees in a single location or hundreds of employees across multiple locations, [Allworx Connect](#) provides enterprise-grade business phone features in an affordable package.

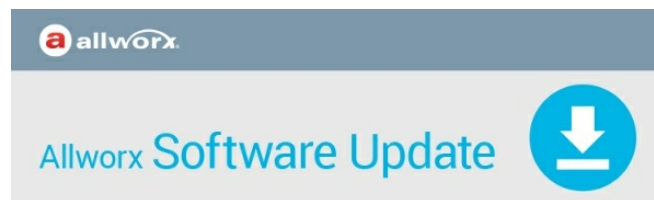

Hosted Solution for Allworx Use Your Existing Allworx Phones

Hosted VoIP is another term for Hosted PBX. "Hosted" means the VoIP server is hosted at an off-site data center rather than at your site.

A hosted option for your Allworx phone systems is now available. It can be a lower cost solution that includes a refresh of your Allworx server, phones, and warranties. As your current contract expires, I would encourage a close look at it. The service is from Princeton Hosted Solutions.

Princeton can provide the network and phones as a bundle, generally at a lower cost, and act as your single point of contact. They offer a secure backup service for your hosted Allworx with two data centers.

For more information, contact Jack Bush at 847 459 1220 or jbush@sandgcom.com.

System Software 8.5 - More Users, More Features

System Software Release 8.5 along with Interact™ 4.0, Reach™ for iOS 5.1 and Reach™ for Android 5.1 provide new, exciting features:

- Support for up to 250 users on Allworx Connect 731 Systems and 60 users on Allworx Connect 530/536 servers;
- Park to Extension for parking calls for specific users or groups;
- Secure remote server administration using client (web browser) certificates;
- Spanish and French Canadian character support for user and other displayed names;
- Import/Export of Audit PIN Codes;
- Minor bug fixes, and more.

Allworx® announces the Release of System Software 8.5.3

System Software Release 8.5.3 provides new, important features along with the usual monthly bug fixes:

- Programmable button pages on Allworx Verge™ 9312 IP Phones, providing 60 buttons total
- Barcode-driven "Quick Add" phone installation

- System-wide, caller ID-based call routing, and more.

S&G Communications

Our engineers provide design and implementation of IP phone systems and network services from all the leading carriers. We also offer WiFi services, cloud services, network analysis and network optimization services.

Our technicians install voice and data cabling, fiber optic cabling, racks, cabinets, under-floor tray systems, wireless access point installation, and more. Our installers are certified, union technicians. By using quality products and certified technicians, we can provide you with an infrastructure capable of supporting all applications designed for today's standards.

Allworx Training and Service Center - As a premier provider of Allworx IP phone systems, we offer free on-site training and a suite of post-implementation services to help you successfully maintain your system.
