

Verkada Video Surveillance Systems for Manufacturing Powered by Artificial Intelligence (AI)

Why Manufacturing
Companies and
Warehouses
Choose
Verkada
Surveillance
Systems

Verkada's Video Surveillance System is powered by Artificial Intelligence (AI) making it both smart and simple to create a secure work environment. Verkada is the leader in cloud-based security by a 4 to 1 margin. The [Verkada](#) system integrates video surveillance, access control, environmental sensors, and more.

Workplace safety

Reduce injuries with proactive detection and risk mitigation

Site security

Resolve security and compliance gaps with a comprehensive platform

Operational efficiency

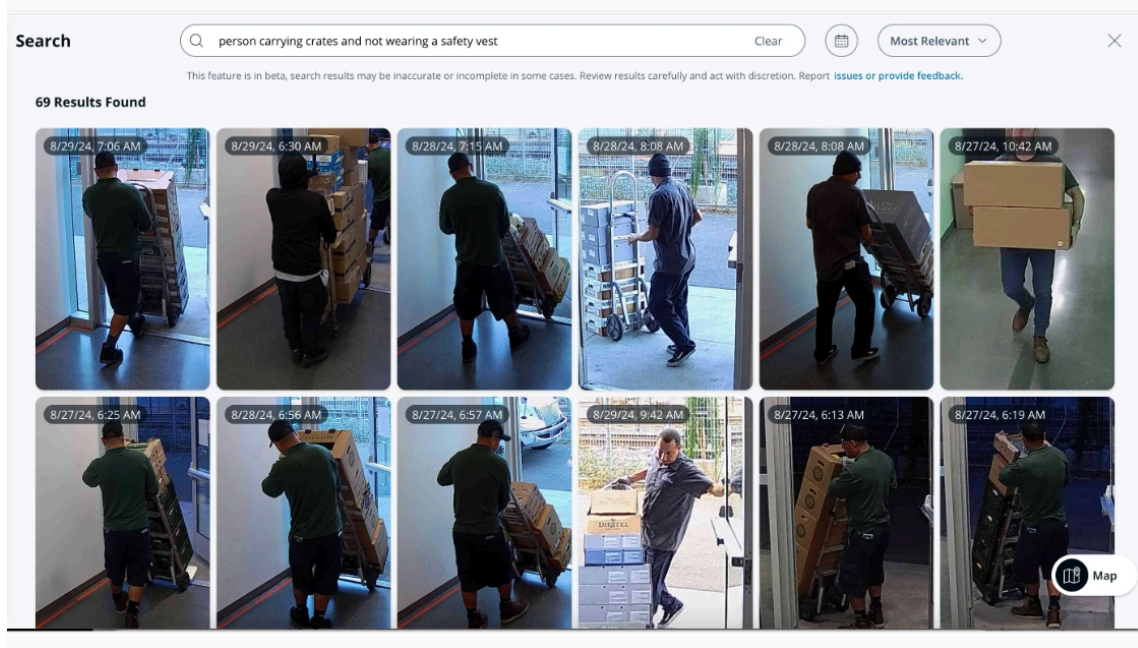

Optimize day-to-day plant and warehouse operations with video-driven insights

Verkada
Artificial
Intelligence
(AI)
Powered
SEARCH
Capabilities

A highlight of the Verkada system is the AI search of video. No more sequential viewing of footage to find the key incident. Verkada's new AI-powered search feature allows customers to use free-form text to search for people and vehicles in a highly-detailed manner using specific attributes like clothing or vehicle type or color. Now, users can enter their query directly on the search bar for common search variables such as:

- Male/Female
- Color or type of clothing, i.e. blue hoodie
- Color or type of vehicle
- License plate
- Use of safety vests or eye protection
- Use of equipment. i.e., forklift

The following illustration shows a search for a "person carrying crates and not wearing a safety vest".

Verkada Smart Air Quality and Building Sensors

Verkada built a lineup of all-in-one environmental sensors that streamlines data insights across up to 15 different environmental readings into a centralized dashboard that provides data and visibility across sites. The sensors can detect particulates of smoke near a bin of oily rags, and can track temperature in the production area. The real-time data can trigger alerts for immediate action as well as provide historical data. Reports can assist in keeping the costs of insurance, workers comp, etc., under control.

SV21	SV23	SV25
All in One Air Quality Sensor	Everything in the SV21 Plus	Everything in the SV23 Plus
Carbon Dioxide Temperature Relative Humidity	AQI Motion Noise TVOC Vaping/Smoking PM 2.5	Carbon Monoxide Light Barometric Pressure Formaldehyde

Verkada Access and Visitor Control

Verkada's Access Control Protects Critical Access Points

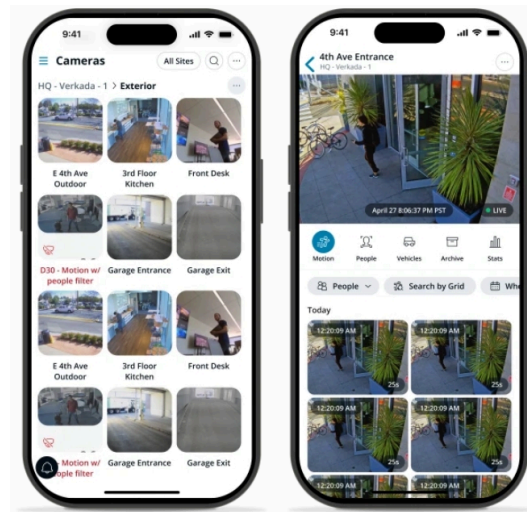

- Centrally manage doors, sites, and employee access from a web-based platform
- Automatically open gates, log all access events and vehicle entry using license plate recognition
- Safeguard sensitive areas like labs, IT rooms and production areas with role-based permission badges
- Another production facility near Chicago uses employee ID badges for both the Verkada Access Control and for clocking in and out of their ADP payroll system
-

- Keep track of on-site visitors with seamless check-in that includes built-in photo ID, badge printing, and instant background checks

Manage Video Surveillance from Anywhere

Verkada's Command platform can be used remotely enabling you to manage video surveillance from anywhere. Even in mobile deployments, Verkada's solution is capable of providing all of the same powerful features that are always accessible from any device.

Our Suite of Cloud-Based Solutions

Modernize your building's approach to physical security and awareness in an all-in-one solution.

Camera

Powerful onboard processing to bring simplicity and speed to your investigations.

Access Control

Plug-and-play access control solution built for ease of use and limitless scale.

Environmental Sensor

Data-driven insights for monitoring changes across your environment.

Alarms

Cloud-managed intrusion detection with 24-7 professional monitoring.

Guest

Personalize the check-in experience for all types of visitors while integrating with cameras and access control.

Mailroom

Intuitive app and dashboard to track shipments and help ensure deliveries get to the right people.

Intercom

Seamless talk-down and unlock capabilities to manage building traffic right from arrival.

About S&G Communications

For over 25 years, NexGen/S&G Communications has been assisting enterprises with their technological upgrades and installations including VoIP phone systems, WiFi, network services, cabling, and surveillance system needs. We are a **Certified Gold Verkada Partner**. To date, we have installed Verkada products in the following companies and several others are in the planning stages.

- Dover Fueling Solutions in Austin, TX
- Destaco in Wheeling, IL, Mt. Juliet, TN, Redwing, MN, and Auburn Hills, MI
- Waukesha Bearings DPC, Antigo, WI, Waukesha, WI and Pawcatuck, CT
- Belanger, Inc. OPW Vehicle Wash Systems, Livonia, MI
- OPW Midland, Skokie, IL

We'd love to share with you how other companies are using Verkada and how the Verkada product line can enhance safety and security at your business. We offer turn-key implementation and installation. We have union cabling technicians and certified network engineers on staff, all very experienced with the Verkada line. We would be happy to discuss the Verkada system with you, schedule an online demo, or conduct a detailed security site survey.
